

Math 135

Note Title

10/15/2010

Announcements

- No class Monday
- HW due Wed
- Building closed all weekend

Ex:

```
ALGA(A[0...n-1])  
  x ← n  
  for i = 1 to 21000  
    x ← x + A[i mod n] + n  
  return x
```

a_0, \dots, a_{n-1}

1 → x := n
for i := 1 to 2¹⁰⁰⁰
2¹⁰⁰⁰ [3 → x := x + A[i mod n] + n
1 → return x

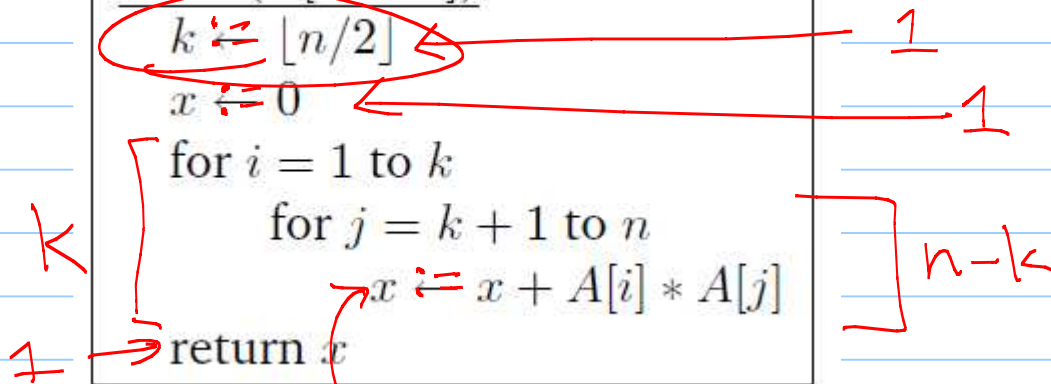

↑
 $a_{i \bmod n}$

Big-O?

$$\text{Total: } 1 + 2^{1000} + 2^{1000} (3) + 1 \\ = O(1)$$

Ex:

```
ALGD(A[1...n]):  
  k := ⌊n/2⌋  
  x := 0  
  for i = 1 to k  
    for j = k + 1 to n  
      x := x + A[i] * A[j]  
  return x
```

$$\text{Total: } 1 + 1 + \sum_{i=1}^k \sum_{j=k+1}^n 3 + 1 = 3 + 3 \sum_{i=1}^k (n - k)$$

Big-O bound

$$\underbrace{\sum_{j=k+1}^n 3}_{3(n-k)}$$

$$3 + 3 \sum_{i=1}^k (n-i) = 3 + 3(n-1) + (n-2) + \dots + (n-k)$$

$$= 3 + 3 \left((n-1) + (n-2) + \dots + \frac{n}{2} \right)$$

$$\leq 3 + 3 \underbrace{(n + n + n + \dots + n)}_{n/2}$$

$$= 3 + 3n \left(\frac{n}{2} \right) \approx O(n^2)$$
